Dassana Score

Risk-based vulnerability and attack surface management made possible.

A core aspect of moving to a more mature cybersecurity program is formalizing your ability to measure and report cybersecurity performance. However, measuring cybersecurity is not easy. In fact, at times, it can be near impossible. Especially with an ever-expanding attack surface and associated data overload.

Unlike other business functions where performance can be easily quantified in terms of revenue, profit, etc., cybersecurity lacks such straightforward metrics. Measuring the performance of cybersecurity in terms of risk reduction or incident prevention is challenging. In addition, obtaining accurate and relevant data to measure cybersecurity performance can be difficult.

of companies are optimizing and continuously improving their cybersecurity practices [1]

Track the KPIs that Matter: Dassana Score

Dassana Score™ provides you with a FICO-like security score, which helps track the service level agreements (SLAs) of your team, streamline resource allocation, influence your team's security behavior, and overall foster a positive security culture.
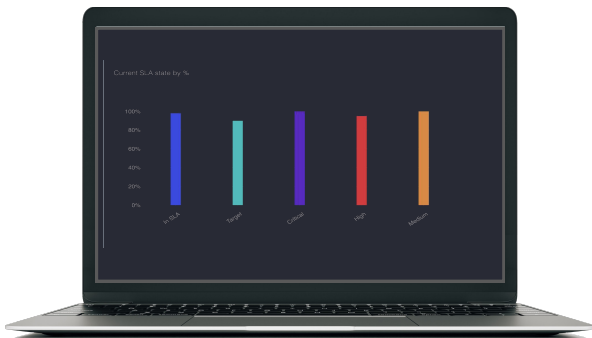

Leverage Dassana Score dashboards to demonstrate your team's value beyond just reducing risk. By showcasing your SLA compliance, your can deliver a compelling, data-driven narrative that makes it easier to secure executive support and investment in the future.

Track the outcome of your security team's efforts in transferring, avoiding, accepting, or mitigating risk. This helps you streamline your resource allocation and allows you to take steps to further reduce your cyber risk exposure.

1 PwC, What's Important to CISOs in 2024

By providing a FICO-like security score, you can not only monitor your team's adherence to service level agreements (SLAs) and optimize resource allocation but also shape your team's security practices, thereby cultivating a positive security culture overall.

Set the Tone for Security Behavior and Culture

Discover how you can finally deliver the right answers to your management team and board.

Steer team productivity

Leverage insights into how fast risks arrives, how long it survives, and if remediation efforts are truly effective in eliminating risk to establish an accurate picture of your team's productivity. This tells you if you can meet your set SLAs

Quantify your performance

Quantify your remediation efforts and outcome by leveraging a performance-based security score that allows you drive behavior within your team and helps create a mindset focused on risk reduction.

Dassana Remediate

Enable your security teams to swiftly spot high-priority risks and act to mitigate them by prioritizing global security concerns through rich contextual and situational analysis of relevant data.
